ABOUT US

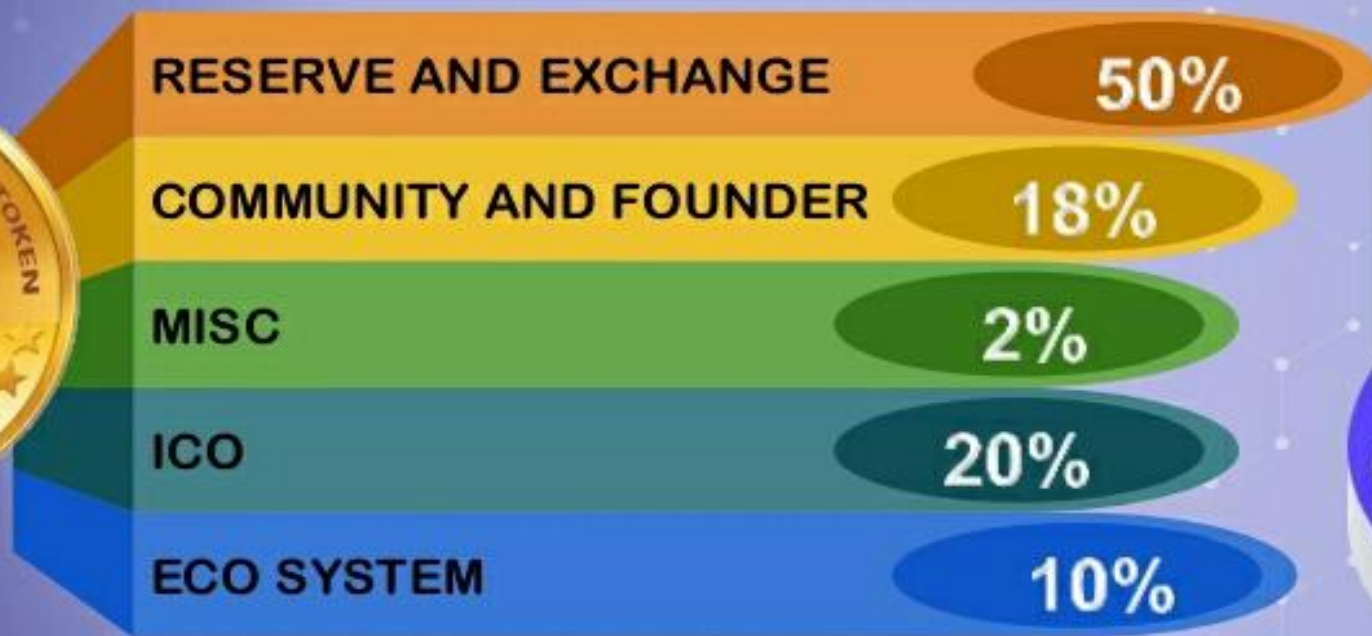

After long negotiations, we united 7 small companies into one. Our structure has huge benefits among others, because all our facilities, management, and other part of processes are located geographically in almost all parts of the world.

We are a group, created from several small companies with main office in 10021, new york, las vegas NY, USA. Due to the recently occurred halving, we decided to combine our facilities and organize one large company. This association has made us a larger and more powerful player on the market.

In the process of organizing the merger, we carefully selected participants for association. All the individuals passed a strict selection according to such parameters as: energy efficiency, minimum power of at least 1 million GH/S, activity at least 3 years on the market, the technological level of equipment is appropriate our high requirements. Also, our experts have developed unique software for switching power units and optimizing processing in order to receive profit as quickly as possible.
